(Discuss importance in terms of historical or architectural context as defined by theme, period, and geographic scope. Also address integrity)

Building N-253C was constructed in 1993 on the western border of the NASA Ames Research Center to function as a Sentry House for an access gate into the center. Research at the NASA Ames Research Center Main Library did not yield any relevant historical information on this property.

Building N-253C was constructed in 1993 and does not meet the fifty-year old threshold for National Register of Historic Places properties. Furthermore, the building does not qualify under National Register Criteria Consideration G: Properties That Have Achieved Significance Within The Past Fifty Years, since it is of contemporary construction and does not possess exceptional significance under any of the National Register criteria.
